Automation Testing
Q spiders Rajajinagar
09/2024 – 05/2025 | Bangalore
Core Java
Advance Selenium
API Testing
Manual Testing
Mysql(JDBC)
Live Projects

🧠 SKILLS

Advance Selenium

- **Automation Tools & Frameworks**: Selenium WebDriver, TestNG, Maven, Jenkins
- **Framework Implementation**: Page Object Model (POM), Data Driven, Modular Driven, Hybrid Frameworks
- **Programming & Scripting**: [Java expertise]
- **Test Management**: Conversion of manual cases to automation scripts, script review, batch/group execution
- **Web Technologies**: Strong knowledge of **CSS, DOM, XPath** for object identification
- **Test Execution**: Cross browser testing, handling pop-ups, use of descriptive programming
- **Version Control (if applicable)**: [Git/GitHub/Bitbucket]

AGILE METHODOLOGY

- **Agile Methodologies**: Scrum, Sprint Planning, Daily Stand-ups, Retrospectives, Product Backlog Refinement, Bug Triage

Manual Testing

- Designed and executed **test cases and test scenarios** covering both functional and non-functional aspects of the application.
- Performed **smoke, functional, integration, system, regression, and usability testing** according to project needs.
- Participated in **ad-hoc and exploratory testing** to uncover edge cases and usability issues.
- Conducted **compatibility testing** across different browsers and environments.
- Executed **globalization and localization testing** to validate application usability across multiple languages and regions.
- Logged defects in the tracking system, monitored them through the **defect life cycle**, and coordinated fixes with developers.

Test Management & Tools

- Knowledge of **Test Case Management tools** like **JIRA with Zephyr Scale** for creating, organizing, and executing test cases.
- Hands-on experience with **Cross Browser Testing tools** such as **Sauce Labs** to validate application behavior across multiple browsers and platforms.

MYSQL Skills

- Proficient in using **JDBC API** methods for executing SQL queries in automation and backend testing:
